PROFESSIONAL SUMMARY

Motivated Full Stack Developer proficient in **HTML, CSS, Bootstrap, Tailwind CSS, JavaScript, and MySQL**, with expertise in **MERN Stack (MongoDB, Express.js, React.js, Node.js)**. Hands-on experience building RESTful APIs and responsive interfaces during internships at **SaiKet Systems** and **InnoByte Services**. Quick learner with strong problem-solving skills, eager to contribute as a fresher.

TECHNICAL SKILLS

- **Frontend:** React.js, HTML5, CSS3, JavaScript (ES6+), Bootstrap, Tailwind CSS, Material UI
- **Backend:** Node.js, Express.js
- **Database:** MongoDB, MySQL, Microsoft SQL Server
- **API Development:** REST APIs, JSON, API Integration
- **Tools & Others:** Git, GitHub, Firebase

INTERNSHIP EXPERIENCE

Full Stack Development Intern – SaiKet Systems | *15/06/2026 – 15/07/2026*
User Management System | React.js, Node.js, Express.js, MySQL, Axios, Bootstrap

- Built a full-stack CRUD application to manage user records, with a React frontend consuming a REST API and a MySQL-backed Express server.
- Implemented Create, Read, Update, and Delete operations with parameterised SQL queries, client-side form validation, and a responsive Bootstrap UI with live user count and edit/delete actions.

Full Stack Developer Intern – InnoByte Services | *15/03/2026 – 14/04/2026*
Blog REST API | Node.js, Express.js, MongoDB, Mongoose, JWT, bcrypt

- Built a RESTful API with 10+ endpoints for user authentication and full CRUD on posts and comments, using JWT with bcrypt password hashing and custom Express middleware to protect all write operations.

PROJECTS

Loan Approval Prediction System GitHub | *React.js, Node.js, Express.js, MongoDB, JWT — Team Project (Final Year MCA)*

- Worked as a full-stack developer in a team to build a loan management platform with role-based user/admin dashboards, JWT authentication, and email-based password reset.
- Built a rule-based loan scoring engine evaluating credit score, income-to-loan ratio, employment type, collateral, and tenure to auto-approve, auto-reject, or flag applications for admin review.
- Implemented an admin analytics dashboard using MongoDB aggregation pipelines to track monthly approved loan amounts, and PDF receipt generation for approved loans.

CART.AI Sarees GitHub | *HTML5, CSS3, JavaScript, Node.js, Express.js, MySQL*

- Built a multi-page e-commerce application (saree store) with user registration/login, category-wise product listing with search, a persistent cart, and checkout flow, backed by a Node/Express REST API and MySQL database.
- Implemented client-side cart and order management using localStorage, with quantity controls, dynamic price totals, and an order-history page pulling live product data from the backend.

The Culinary Editorial – Recipe Book App GitHub | Live | *HTML5, CSS3, Bootstrap 5, JavaScript, REST API*

- Recipe finder app with live search and detail modals, powered by the DummyJSON API and vanilla JavaScript.

Weather App GitHub | Live | *React.js, Tailwind CSS, HTML, CSS, JavaScript, Firebase Hosting*

- Real-time weather dashboard built with React and Tailwind CSS, displaying live weather data with a clean responsive interface.

Food_App – Food Ordering UI GitHub | Live | *HTML5, Tailwind CSS, Bootstrap 5, Firebase Hosting*

- A responsive food-ordering landing page with a promotional carousel, sticky navbar, and a featured-items grid showcasing 8+ dishes with pricing, deployed live on Firebase Hosting.

Expense Tracker Dashboard GitHub | *React.js, Bootstrap, Bootstrap Icons, CSS*

- Personal finance dashboard built with React, featuring expense tracking with localStorage persistence and a responsive Bootstrap UI.

EDUCATION

Master of Computer Applications (MCA) — BPUT, Odisha | 2024 – 2026 | All Semesters Cleared | 4th Sem SGPA: 8.69 (Certificate Awaited)
Bachelor of Computer Applications (BCA) — Utkal University, Odisha | Completed | 75%
